

Newborn Sessions

Newborn photography is my passion. I absolutely love these brand new little blessings and being able to photograph them in their first couple weeks of life brings me so much joy. I am completely confident that during your session I will get your baby to sleep, and pose in those sweet poses using my baby whispering skills resulting in final images that will make your heart happy. Every client is different in what they are looking for so in order to have something for everyone I have three different newborn session options.

Milestone Mini Sessions

Milestone Mini Sessions are done during the milestone's of baby's first year. Instead of going by months I suggest you book them by milestones.

Milestone One

When baby can hold their head up by themselves (usually 3-4 months). T

Milestone Two

When baby can sit up on their own at least for a bit of time but hopefully isn't crawling (usually around 6-7 months).

Milestone Three

When baby turns one.

Starting in 2015 I will be offering "styling" with all Milestone Mini Sessions if desired for no additional cost to you. This means that I have both clothing and accessories for these sessions, most are one of a kind beautiful pieces. These are sweet, natural, and simple. The goal is to deliver timeless images that show how precious they are during this first year of life. It is unbelievable how much baby's change in the first year, and I know these photos will be some you will treasure for a lifetime.

- * 30 minute session
- * Free styling if you choose
- * 10 edited images with printing rights

The miracle of bringing a new life into this world will never get old to me, I love to capture this time in a family's life, whether you are welcoming your first or fifth child.
